

The Financial Planning Process

Following a methodical process helps to make sure that we are doing everything possible to help you move toward your "preferred future." Here's our process:

- **Step 1: Get Acquainted Meeting** – This is an opportunity for us to meet with you in person to discuss your needs and our services in detail. Then we'll decide together whether we are a good resource for you. There is no cost to you for this Get-Acquainted meeting.
- **Step 2: Goal Setting and Data Gathering** – We review the goals that you have in life and with your money. We also take an inventory of your current financial condition.
- **Step 3: Analysis and Financial Plan** – We review the data and formulate a list of recommendations and discussion items.
- **Step 4: Plan Implementation and Follow Up** – We help, as you see fit, to implement your financial plan. Our firm may be able to help you with some of the needs (ex: investments and/or insurance). We may also work with your other financial advisors.

Steps 1, 2, and 3 may be completed in one meeting or may require multiple meetings. Our goal is to take whatever time is necessary to develop the best game plan possible.
